- ✓ Databases/Apps: MS Access, Adobe Photoshop
- ✓ Support: Hardware/software setup & troubleshooting

### **Professional Skills**

- ✓ Project leadership & teamwork
- ✓ Strong communication
- ✓ Curriculum development
- ✓ Data analysis & problem-solving

## **Professional Summary**

Results-driven Information Communication Technology Professional with a Bachelor of Science in Information Technology from St. George's University. Passionate about leveraging technology to enhance operational efficiency, I bring over nine (9) years of experience in IT management and education, specializing in troubleshooting both hardware and software issues, developing user-friendly solutions, and creating comprehensive system guidelines for institutions. As an experienced Information Technology Teacher, I've coordinated and led training sessions—especially during the transition to online learning—while developing the technology skills of both students and staff. I possess a strong aptitude for project management, team leadership, and strategic IT planning, enabling me to drive technological innovation and system improvements. With a deep commitment to problem-solving and communication, I aim to foster tech-driven growth and literacy across all levels of the organization.
